Level IIIA (3A) is typically the highest level of protection you will find in soft armor. Our vest will protect you from everything from a BB gun to a .44 magnum. That is great protection. Don't settle for other vests that offer level IIA or level II. You want level IIIA. Launched in 2013 and just recently received a redesign. Five major upgrades are now included in the vest to make it more concealable, more comfortable, and ready to work. We are convinced, that if you need to buy a bulletproof vest, that the BulletSafe Bulletproof Vest is the best choice for you.

Vest Pricing will be provided during initial consultation to insure proper sizing and fitting.
